

SQL

Load the **university.sql** script into phpMyAdmin. Considering the database schema bellow, build the queries needed to answer the following questions (the expected result is shown for each query).

- List the name and salary of all lecturers.

name	salary
Ana Costa	3500.00
Rui Silva	2800.00
Maria Lopes	3600.00

- List all departments located in Building A.

department_id	name	building	telephone
1	Computer Science	Building A	220-100-100

- Show the title and credits of all undergraduate courses.

title	credits
Databases	6
Calculus	6

- List all students registered in 2023.

student_id	first_name	last_name	programme	registration_date
301	Pedro	Santos	Computer Science	2023-09-15
302	Inês	Ferreira	Mathematics	2023-09-15

- Show lecturers and the department they belong to.

name	department
Ana Costa	Computer Science
Rui Silva	Computer Science
Maria Lopes	Mathematics

- Show each department and its head lecturer.

name	head_lecturer
Computer Science	Ana Costa
Mathematics	Maria Lopes

- List all course editions with course title and academic year.

title	academic_year
Databases	2024/2025
Databases	2024/2025
Calculus	2024/2025

8. Show all enrolments with student name, course title, and semester.

first_name	last_name	title	semester
Pedro	Santos	Databases	1st Semester
Pedro	Santos	Databases	2nd Semester
Inês	Ferreira	Databases	1st Semester
Inês	Ferreira	Calculus	1st Semester

9. Count the total number of departments.

total_departments
2

10. Calculate the average lecturer salary.

average_salary
3300.000000

11. Show the minimum and maximum course credits.

min_credits	max_credits
6	6

12. Count how many courses each department offers.

department_id	total_courses
1	2
2	1

13. Show the number of students enrolled in each course edition.

edition_id	total_students
201	2
202	1
203	1

14. List course editions with more than one enrolment.

edition_id	total_students
201	2

15. Show the number of courses per level (Undergraduate/Postgraduate).

level	total_courses
Undergraduate	2
Postgraduate	1

16. Show students enrolled in more than one course edition.

student_id	total_enrolments
301	2
302	2

17. List courses that currently have at least one enrolment without a grade.

title
Databases

18. Show the total number of enrolments per student (including zero).

student_id	first_name	last_name	total_enrolments
301	Pedro	Santos	2
302	Inês	Ferreira	2

19. Find the department with the highest number of courses.

department_id	total_courses
1	2

20. Show the average final grade per course.

title	average_grade
Calculus	14.00000
Databases	14.75000
